Consultant Business Central Developer – Business Solutions Team

Hiring organization
Prosperity 24/7

Employment Type
Full-time

We are looking for an experienced **Business Central Developer** to join our **Business Solutions Team.** You will be responsible for designing, developing, and maintaining extensions and integrations within Microsoft Dynamics 365 Business Central. In addition, you will work closely with consultants, clients and internal stakeholders contributing to the successful delivery of ERP projects by creating high-quality, efficient and maintainable code that supports business processes and client requirements.

Key Skills

You will have proven experience developing extensions in AL for Dynamics 365 Business Central (or NAV) along with experience working in Visual Studio Code with Git and AL development tools. A strong understanding of the Business Central application structure, tables, events and extensibility model and familiarity with APIs, web services and Business Central integration patterns. Furthermore, experience with Azure DevOps, CI/CD pipelines, and environment management tools (e.g., Docker).

About You

You will be able to demonstrate excellent attention to detail and commitment to producing clean, maintainable code along with strong analytical and problem-solving skills. Also have the ability to work to deadlines and manage multiple priorities while actively learning new technologies and practices.

How do I learn more?

If this opportunity excites you and you're keen to continually challenge yourself on the path to helping our clients achieve great things we look forward to hearing from you.

A Jersey Housing License may be available for this role.
